

# ADITYA AVINASH BAHEKAR

## Full Stack Developer (MERN) — Aspiring Full Stack Development Intern

Amravati, Maharashtra, India | [adityabahekar84@gmail.com](mailto:adityabahekar84@gmail.com) | GitHub: [adityaBahekar](#) | LinkedIn: [adityabahekar](#) | portfolio: [moreInfo](#)

### SUMMARY

Third-year Computer Science Engineering student and Full Stack Developer with hands-on experience building web applications using React.js, Node.js, Express.js, MongoDB, MySQL, and JavaScript. Skilled in designing client-side and server-side architecture, developing REST APIs, integrating third-party services, and testing/debugging full-stack applications for reliability and scalability. Comfortable collaborating with cross-functional teams to deliver high-quality results on schedule, in remote/WFH settings.

### TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), HTML5, CSS3, Python, C, C++

**Frontend:** React.js, HTML5, CSS3, Vite, Responsive UI Design

**Backend:** Node.js, Express.js, REST APIs, Middleware, MVC Architecture

**Database:** MongoDB, Mongoose, MySQL, PostgreSQL

**Auth & Security:** JWT, RBAC, Session Management, HTTP-only Cookies, CORS

**Tools & DevOps:** Git, GitHub, Postman, Docker, Redis, CI/CD, MongoDB Atlas, ImageKit

### PROJECTS

#### Secure Authentication & Session Management System | *Node.js, Express.js, MongoDB, Mongoose, JWT*

- Developed a secure authentication backend with registration, login, logout, protected routes, and multi-device session support.
- Implemented JWT access/refresh tokens with rotation, role-based access control (RBAC), and HTTP-only cookie-based storage, plus password hashing and centralized error handling.

#### Globetrotter — MERN Full-Stack Hackathon Application | *React.js, Node.js, Express.js, MongoDB*

- Developed a responsive travel-planning web application, as part of a 4-member group in an 8-hour hackathon, that helps users explore destinations and organize travel plans through an intuitive interface.
- Integrated a React frontend with Node.js/Express REST APIs and MongoDB via Mongoose; debugged connectivity and deployment issues, contributing to ~95% project completion within the hackathon window.
- Live Demo:** [globe-trotter-swap9.vercel.app](https://globe-trotter-swap9.vercel.app)

#### Scalable URL Shortener API | *Node.js, Express.js, PostgreSQL, Redis, Docker*

- Developed a production-ready REST API for URL shortening with custom aliases, expiration, redirects, and click analytics.
- Designed and optimized a PostgreSQL relational schema with indexing and constraints, and integrated Redis caching and rate limiting.
- Implemented request validation and centralized error handling, with Docker-based deployment and a CI/CD pipeline.

### EDUCATION

#### Bachelor of Technology — Computer Science & Engineering

P. R. Pote Patil College of Engineering & Management, Amravati | 2024 – Present (Third Year) | CGPA: 8.87/10

12th (HSC) — Shri Shivaji Science College, Amravati | 85.5%

10th (SSC) — Gujarati English Primary School, Amravati | 90.80%

### CORE COMPETENCIES

Client-server architecture • RESTful API design • Asynchronous JavaScript • CRUD operations & database modeling • Debugging (API, DB, auth, deployment) • Agile/collaborative development with Git & GitHub
